Conference abstract in proceedings

Templates for conference contributions published in a proceeding.

These will often have an ISBN number, an identifiable publisher and/or be a publication with titles like "Proceeding of the ..."

When a conference contribution is published in a proceeding, there are a few fields in the template – other than the mandatory fields marked with a red star – that needs to be filled out if possible. It is publisher, ISBN and editors.

The screenshot shows the 'Host publication' section of a registration form. The form is titled 'Publication: Article in proceedings' and has a 'Change template' button. The left sidebar contains 'EDIT' (with a plus icon), 'Metadata' (selected), 'Metrics', 'Translation', 'History and comments', 'OVERVIEW' (with 'Relations' and 'Display' sub-items), and 'BFI' (with 'BFI information' sub-item). The 'Host publication' section includes fields for 'Title of the host publication in original language *', 'Subtitle of the host publication in original language', 'Publisher' (with an 'Add publisher...' button), 'Volume' and 'Edition' (separate fields), 'Place of publication', 'ISBN (Print)' and 'ISBN (Electronic)' (separate fields), 'Editors of the host publication' (with an 'Add editor...' button), and 'Series information' (with an 'Add book series' button). The 'Events' section below has an 'Event' field (with an 'Add event...' button) and a 'BFI conference series' field (with a '+iii' icon). A note at the bottom of the 'Events' section states: 'Is only used in connection with the distribution of BFI points. It is only possible to attach series that are on the the authorativ list from FI.' Red arrows point from text boxes to specific fields: 'Add publisher...' to the 'Publisher' field, 'Add editor...' to the 'Editors of the host publication' field, 'Add book series' to the 'Series information' section, 'Add event...' to the 'Event' field, and the '+iii' icon to the 'BFI conference series' field.

BFI conference series

Is only used in connection with the distribution of BFI points. It is only possible to attach series that are on the the authorativ list from FI.

If there is an identifiable publisher of the proceeding then it should be added here.

ISBN number(s) and Editor(s) are information that we would like to have added to the registrations if they are available.

If the proceeding is published as part of a book series it needs to be added here. A book series will sometimes have an ISSN number, a volume number and/or a series number.

All submissions of conference contributions need to have an event added detailing the date and the place of the event as well as the title of the event (conference/seminar/workshop etc.).

This field is no longer in use and should not be filled.

2. Conference contribution published in a journal

BFI conference series

+iii

Is only used in connection with the distribution of BFI points. It is only possible to attach series that are on the the authorativ list from FL.

All submissions of conference contributions need to have an event added detailing the date and the place of the event, as well as the title of the event (conference/seminar/workshop ect.).

This field is no longer in use and should not be filled.

3. Unpublished conference contribution

Conference abstract for conference

Paper

Templates for the conference contributions that are not published in a proceeding or journal, but sometimes handed out at the conference, made accessible on the conference website, in a research repository, on a USB-stick ect.

It is often a good idea to link to or upload the publication when using this template.

When a conference contribution is unpublished, there is only one field in the template – other than the mandatory fields marked with a red star – that needs to be filled out, as well as one we would like to have filled out if possible.

Abstract

Number of pages

If known and countable we would like to have the number of pages of the publication added here.

Event

Add event...

All submissions of conference contributions need to have an event added detailing the date and the place of the event, as well as the title of the event (conference/seminar/workshop ect.).

This is especially important on this template since it's the only field where conference information can be added.
