

Getting started with Altmetric Explorer for Institutions

Welcome to the Altmetric Explorer for Institutions!

Your access enables you to:

- Quickly uncover and access attention highlights and patterns.
- Browse, filter, sort, and export altmetric attention across sixteen unique sources + citations.
- View results across your institution, and at the author and departmental level.
- Explore the full Altmetric database of over 11.5 million research outputs with online attention.
- Search for mentions from specific outlets or sources.
- Set up email alerts and create publicly shareable reports.

Logging in

Go to
<http://www.altmetricexplorer.com>.

Click 'create an account' in the top right.

Create a username with institutional email address.

Check your email to validate your account – click the link to confirm and access the platform.

The screenshot shows the Altmetric Explorer login interface. At the top, there is a logo consisting of a colorful circular icon and the text "Altmetric EXPLORER". Below the logo, the heading "SIGN IN TO THE ALTMETRIC EXPLORER" is displayed. The form contains two input fields: "EMAIL ADDRESS" and "PASSWORD". To the right of the password field is a link that says "Forgot your password?". At the bottom right of the form is a black button with the text "SIGN IN" in white. Below the form, there is a small line of text: "If you have any problems accessing Altmetric, please email support@altmetric.com and we'll get back to you as soon as possible."

Explorer Highlights at a Glance

The new Explorer Highlights provides at-a-glance insights as soon as you log in.

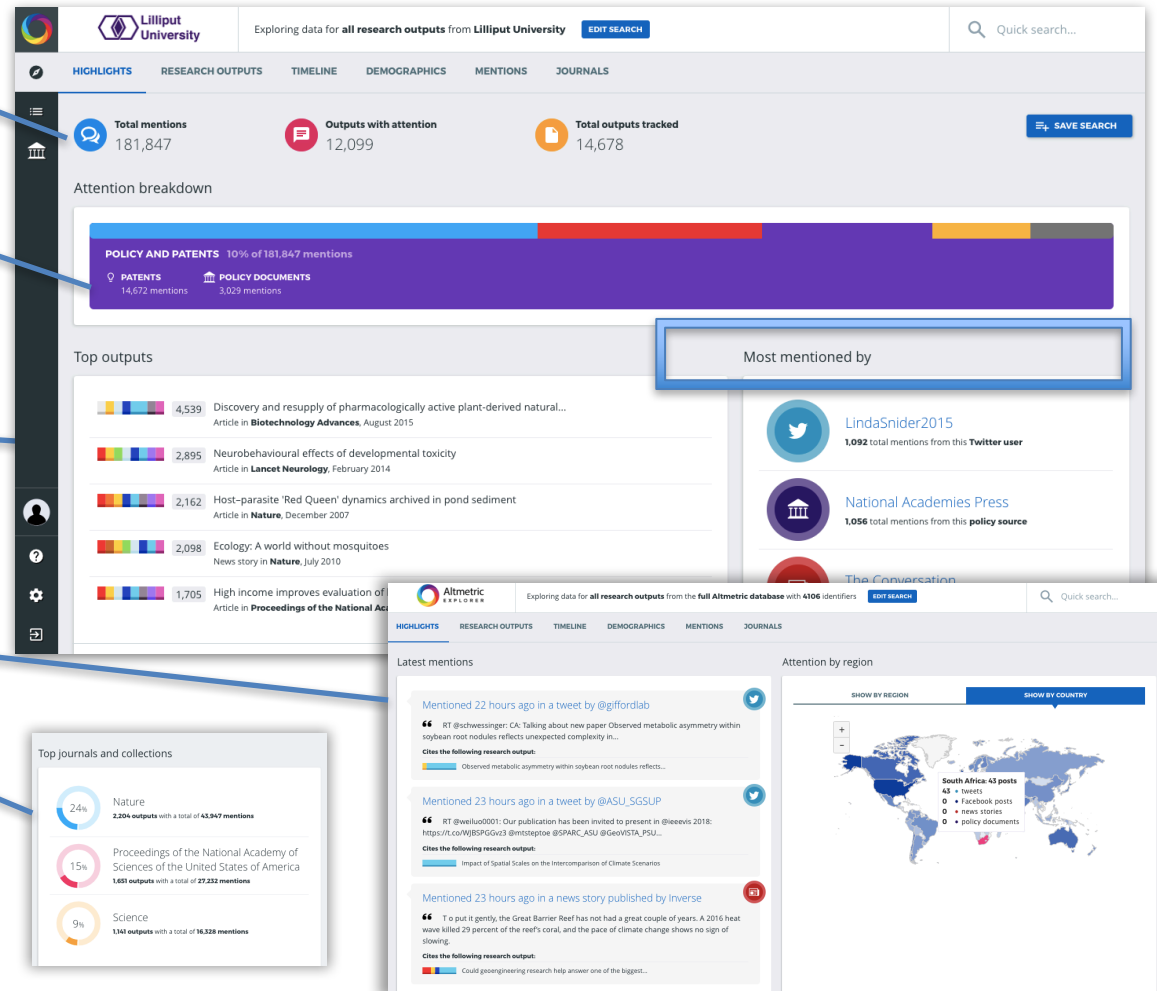

See the current total mentions across your institution or any search set

Quickly view totals and percentages by mention source type

Immediately see your top-mentioned outputs and the influencers sharing and discussing your research the most

Other summary statistics and insights include most recent mentions, top journals/collections, geographic data, plus a a distribution graph of Altmetric Attention across any search set or query.

Dive deeper via links at the bottom of each section.

Analyzing Research Outputs

Click tabs along top menu bar to analyze results further

Quick search for keywords, identifiers, authors or departments from your institution, publisher or journal names, and more.

Edit Search button opens Advanced Search window

Access saved searches, institutional dashboard, and custom reporting

Save your searches to return to results, set up alerts, and build reports

Sort by attention score, source type, publication date, citation count, or recent mentions

Help, account settings, sign out

Click on any badge to go to the details page for that output

Blue tick indicates output is a verified publication from your institution

Export results as a csv or connect directly to the JSON API endpoint

Need more help? Send an email to Support via the button on the bottom right

The screenshot displays the Altmetric Explorer web application. At the top, the header includes the Altmetric Explorer logo, the text "Exploring data for all research outputs from Lilliput University (API)", and an "EDIT SEARCH" button. Below the header is a navigation bar with tabs: HIGHLIGHTS, RESEARCH OUTPUTS (selected), TIMELINE, DEMOGRAPHICS, MENTIONS, and JOURNALS. A search bar on the right contains the text "Quick search...". The main content area shows a list of research outputs. A status bar at the top of the list indicates "Showing 310 research outputs from the results of your search query. Of those, 305 have been mentioned." On the right side of the list, there are buttons for "EXPORT THIS TAB" (with a dropdown menu showing "Download results as CSV" and "Open results in API") and "SAVE SEARCH". Each output entry includes a circular badge with a number and a blue checkmark. The outputs are sorted by "Altmetric Attention Score (Highest first)".

Attention Score	Research Output	Journal	Date
3534	Social Relationships and Mortality Risk: A Meta-analytic Review	Article in <i>PLoS Medicine</i>	July 2010
1700	Meta-analysis of prospective cohort studies evaluating the association of...	Article in <i>American Journal of Clinical Nutrition</i>	January 2010
1247	Developmental Fluoride Neurotoxicity: A Systematic Review and Meta-Analysis	Article in <i>Environmental Health Perspectives</i>	July 2012
910	Dietary sugars and body weight: systematic review and meta-analyses of...	Article in <i>British Medical Journal</i>	January 2012
804	Contribution of Primary Care to Health Systems and Health	Article in <i>Milbank Quarterly</i>	August 2005
582	Preexposure chemoprophylaxis for HIV prevention in men who have sex with men.		
2893	Global, regional, and national prevalence of overweight and obesity in children...	Article in <i>The Lancet</i>	May 2014
1340	The spread of obesity in a large social network over 32 years.	Article in <i>New England Journal of Medicine</i>	July 2007
1036	Global effects of smoking, of quitting, and of taxing tobacco.	Article in <i>New England Journal of Medicine</i>	January 2014
844	A comparative risk assessment of burden of disease and injury attributable to...	Article in <i>The Lancet</i>	December 2012
653	Foodborne Illness Acquired in the United States—Major Pathogens	Article in <i>Emerging Infectious Diseases</i>	December 2010
560	Electronic cigarettes for smoking cessation and reduction	Article in <i>Cochrane database of systematic reviews</i>	December 2014

Your institutional dashboard

Examine department and author-level data via your custom institutional dashboard

Click the building icon on left toolbar from any screen to access

Toggle between your author list and departmental hierarchy

The dashboard is titled "MY INSTITUTION" and features a left sidebar with a building icon. The main content area is divided into two sections: "AUTHORS" (92) and "DEPARTMENTS" (5). The "DEPARTMENTS" section is expanded, showing a hierarchy of departments and their research outputs:

- Department of Humanities: 1,366 research outputs with mentions
 - School of Social Sciences: 1,366 research outputs with mentions
- Department of Life Sciences: 10,736 research outputs with mentions
 - School of Medicine & Medical Science: 5,204 research outputs with mentions
 - School of Natural Sciences: 5,538 research outputs with mentions

The "VIEW RESULTS" button is highlighted for the School of Medicine & Medical Science. A callout points to this button, stating: "Click View Results to see research outputs and attention for any author or department".

Below the departmental hierarchy, a search bar is visible with the text "Use Edit Search to search for multiple authors or departments simultaneously".

The bottom section of the dashboard displays a list of research outputs, sorted by "Altmetric Attention Score (highest first)". The list includes:

- Observational Evidence from Supernovae for an Accelerating Universe and a... (Article in *The Astrophysical Journal*, August 1998)
- Measurements of Omega and Lambda from 42 High-Redshift Supernovae (Article in *The Astrophysical Journal*, December 1998)
- Constraints on the Progenitor System of the Type Ia Supernova SN 2011fe... (Article in *Nature*, December 2011)
- Supernova SN 2011fe from an exploding carbon-oxygen white dwarf star (Article in *Nature*, December 2011)
- Supernova 2007bi as a pair-instability explosion (Article in *Nature*, December 2009)
- The Lick Observatory Supernova Search (Article in *AIP Conference Proceedings*, December 1999)
- Closing in on a Short-Hard Burst Progenitor: Constraints from Early-Time... (Article in *The Astrophysical Journal*, February 2006)
- A faint type of supernova from a white dwarf with a helium-rich companion (Article in *Nature*, May 2010)

Editing queries via the advanced search

Search by author name(s) and/or department(s) at your institution

Toggle between your institution and the full database

The screenshot shows the 'Advanced search' interface. At the top, there's a 'My institution' section with fields for 'VERIFIED AUTHOR' and 'VERIFIED DEPARTMENT'. To the right, a toggle switch allows switching between 'Full Altmetric database' and 'My institution only'. Below this is the 'Publishers, journals, and collections' section with fields for 'PUBLISHER NAME', 'DOI PREFIX', 'JOURNAL OR COLLECTION', and 'HANDLE PREFIX'. The 'Research outputs' section on the right includes fields for 'KEYWORDS' and 'TITLE OF OUTPUT', a 'TYPE OF OUTPUT' section with checkboxes for 'All outputs', 'Articles', 'Books', 'Book chapters', 'Data sets', 'Clinical trial records', and 'News stories', and sections for 'SCHOLARLY IDENTIFIERS' (with an 'ADD SCHOLARLY IDENTIFIERS' button), 'ORCID' (with an 'ORCID' field), 'PUBMED QUERY' (with an 'ADD A PUBMED QUERY' button), 'Dates' (with 'PUBLICATION DATE' and 'Between' and 'anytime' fields), and 'ALTMETRIC MENTIONS DURING' (with an 'anytime' field). At the bottom, there are 'CANCEL', 'CLEAR FIELDS', and 'RUN SEARCH' buttons. Blue lines connect callout boxes to specific features: one to the 'My institution' section, one to the toggle switch, one to the 'TYPE OF OUTPUT' section, one to the 'ORCID' field, one to the 'PUBLICATION DATE' section, one to the 'RUN SEARCH' button, and one to the 'JOURNAL OR COLLECTION' field.

Limit query by output type

Search for publications by scholarly identifier, PubMed query, or ORCID author ID

Search by publisher, journal or collection, DOI or handle prefix, including batch ISSN queries

Limit your search by publication date range and/or those outputs with recent mentions

Click Run Search once criteria and filters are selected

Altmetric Details pages

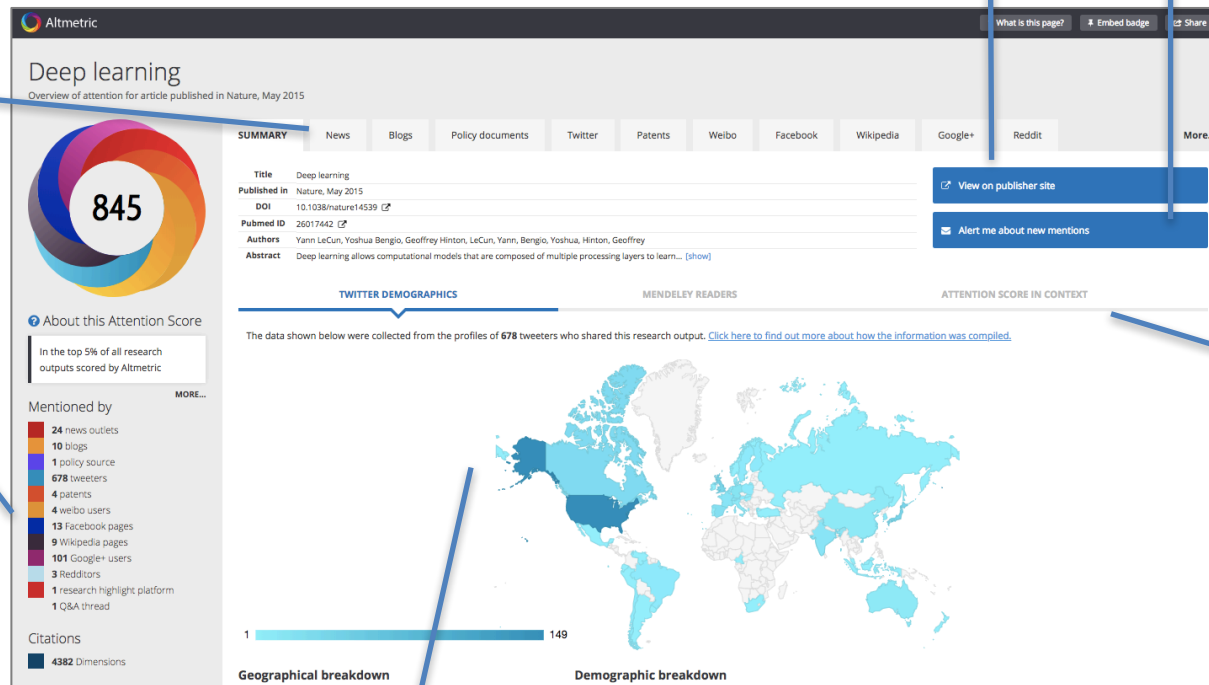

The details pages provide an auditable, public-facing record of each research output's attention, plus additional bibliographic and demographic information.

View publication on publisher site or source of first mention

Receive daily email updates summarizing output's new attention

Click through different attention category tabs to audit each individual mention and citation

Color-coded, live-updating summary of all attention found for this research output

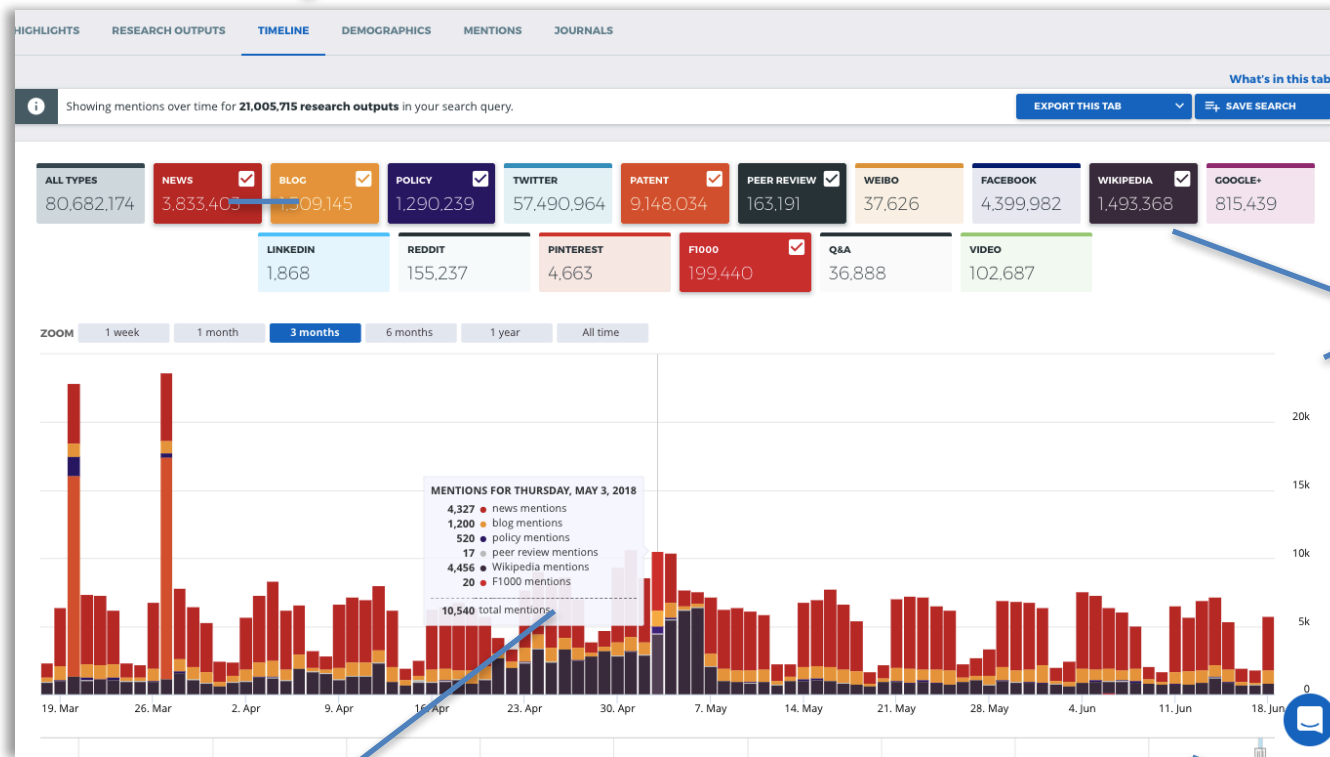

Distribution maps and demographic data for Twitter mentions and Mendeley counts

Attention Score in Context tab ranks output's reach and attention compared to other publications, including those of similar age and from the same journal

See the last page of this guide for an explanation of the 'donut' and attention score

Summary of attention over time

Access attention timeline for any search set via tab along top menu bar

Select sources of attention of value to your stakeholders, benchmarking and analyzing attention patterns

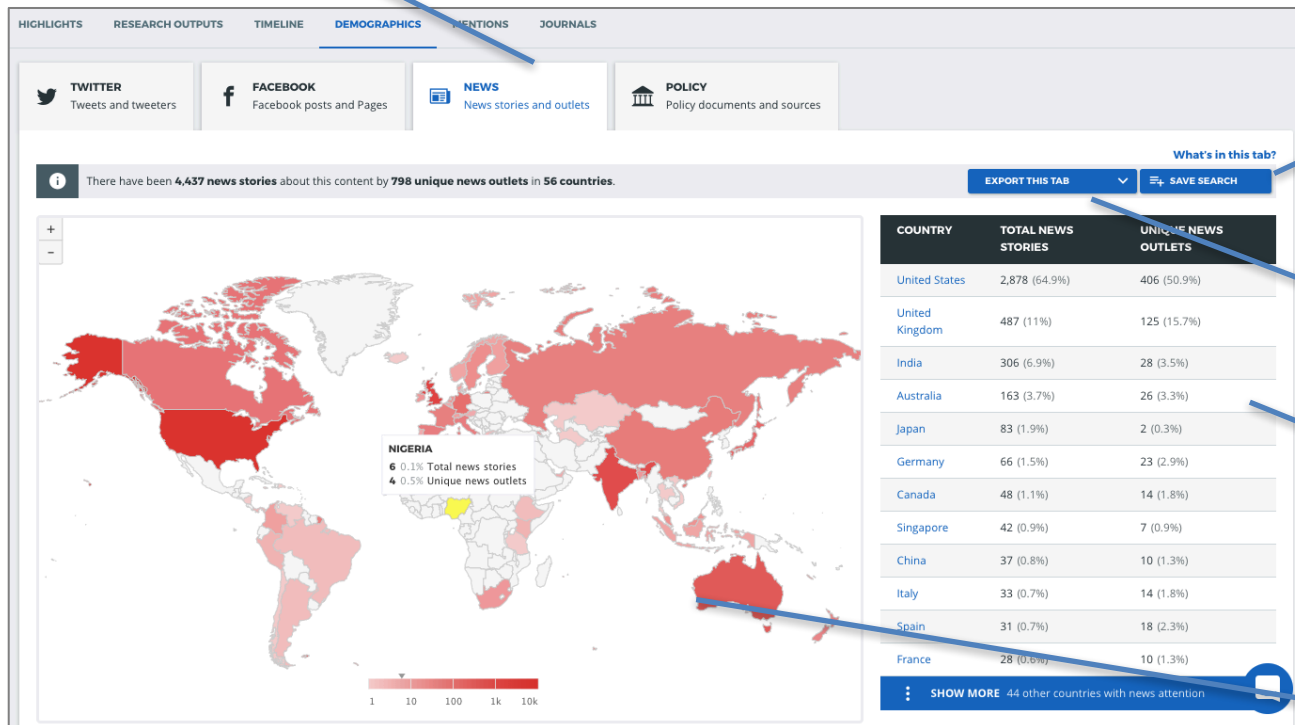

Hover over spikes in graph to view attention breakdown. Click through to see results in Mentions tab

Use sliders along the bottom of the graph to change the time frame of the data displayed.

Demographics Info for any search

Identify and analyze geographic coverage across four distinct attention source types in the Demographics tab.

Interactive distribution maps for Twitter, Facebook, News, and Policy mentions available via tabs along above

Save searches to set up alerts and easily return to updated results.

Export data as csv

Breakdown of mentions via country and unique source - click through to mentions details via map or list

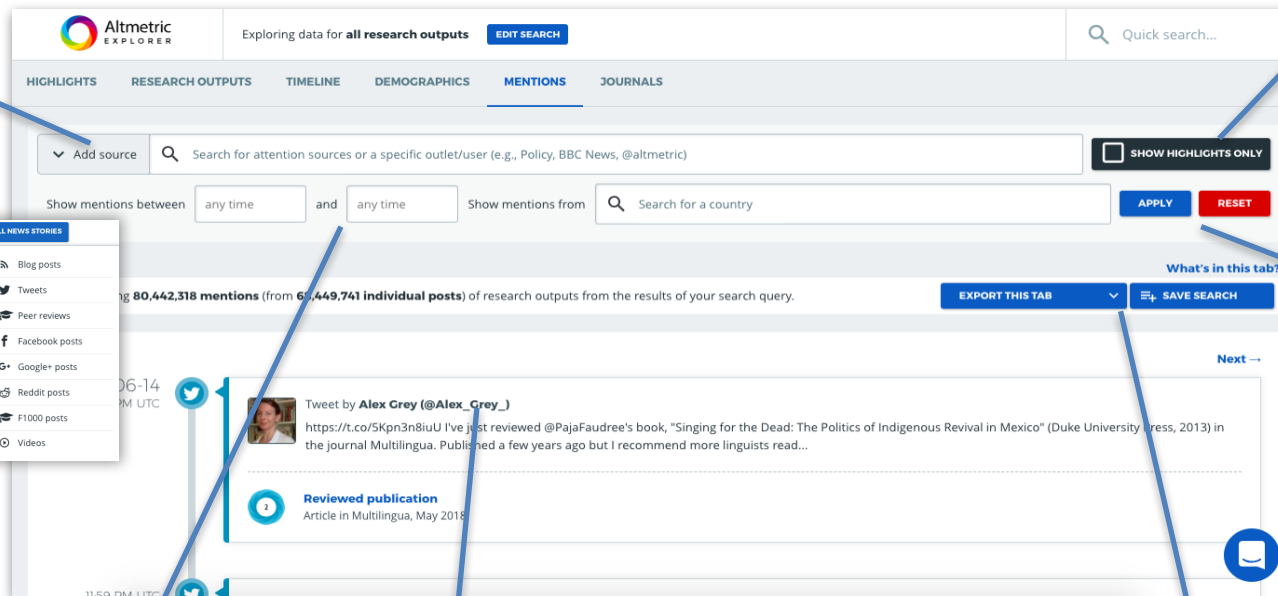

Dive into Altmetric mentions details

Uncover, filter, and analyze mentions across source-types, specific sources, countries, and mention date ranges for any search.

Drop down menu allows you to select one more source type

Search by one or more specific source, by name. Limit by mention date range or country

Click through to any mention source

Filter to view most recent, high-profile news mentions

Click blue Apply button to add selected filters and limiters to search; reset criteria with red button

Save searches or export mentions data as csv or connect to JSON API endpoint

Journal-level data at your fingertips

Analyze attention patterns at the journal or collection level across your outputs or any search set.

Sort results by total mentions or mention-source type to reveal visibility tendencies across different journals

Save search + export results as csv or connect to JSON API endpoint

Click on journal name to view outputs with mentions for each title

Results analysis

Shareable, custom reports for pattern-monitoring and stakeholder engagement

Create a custom report for any saved search, with editable modules to highlight data of most value to your organization. Reports can be shared as a live-updating URL or a pdf.

The screenshot displays the Altmetric Explorer 'SHAREABLE REPORT' interface. On the left is a dark sidebar with a 'SHAREABLE REPORT' header and instructions: 'Choose the information you would like to include in your shareable report. When you are done, click the **Save Changes** button below.' Below this are five blue buttons: 'ADD TITLE', 'ADD OVERVIEW', 'ADD ATTENTION BREAKDOWN', 'ADD ATTENTION CHART', and 'ADD TOP OUTPUTS LIST'. At the bottom of the sidebar is a 'Make public?' checkbox with explanatory text and 'SAVE CHANGES' and 'CANCEL' buttons. The main area shows a report titled 'Attention for my research in the last month' with 'DONE' and 'CANCEL' buttons. Below is a 'REPORT OVERVIEW' section with four metrics: 'Total mentions' (7), 'Research outputs' (3), 'Outputs with mentions' (2), and 'Sources of attention' (3). Each metric includes a brief description. Callouts provide instructions: 'Click blue buttons on side toolbar to add more report modules' points to the sidebar buttons; 'Select Make Public to save as URL, then blue Save Changes button. Share button will reveal report URL' points to the 'Make public?' checkbox; 'Edit the title or delete any auto-populated modules' points to the report title box.

Click blue buttons on side toolbar to add more report modules

Select Make Public to save as URL, then blue Save Changes button. Share button will reveal report URL

Edit the title or delete any auto-populated modules

NAME	DESCRIPTION
meta > query Hash	Contains information about the request you have made: the digest and key you've sent along, any filter parameters, and page requested.
meta > response Hash	Some details about the response being sent to you. It includes the status ("ok" or "error"), a description of your request, and the total number of papers you can paginate through.
links > self links > first links > last links > next String	URLs you can follow to the appropriate page. "next" does not appear when there is no next page.
data Resource (hash) or array of resources	See each endpoints documentation for more information.
data > id String	A unique label for the resource. Every resource has a unique identifier.
data > type String	Every resource has a type. The type determines what information you will find in the 'attributes' of a resource. See the documentation for each endpoint for more information about 'attributes'.
included Array of resources (hashes)	Resources which have been removed from the 'data' resources so they can be optionally included or excluded.

Access API directly from any screen

Volume	Sources	Authors
<p>The Attention Score for an article rises as more people mention it.</p> <p>We only count 1 mention from each person, per source.</p>	<p>Each mention source contributes a different base amount to the final Score, based on the relative reach of the source.</p> <p>For example, a news story in <i>The New York Times</i> contributes more to the Score than a tweet.</p>	<p>How often the author of a mention talks about research, who their audience is, and whether they mention particular journals or publishers often.</p> <p>For example, organic interest in an article from a doctor counts more than a journal tweeting the same link.</p>

The Altmetric Attention Score and badge are designed to quickly indicate the type and volume of attention an item has received.

The score increases the more unique attention an output receives; it may go down if the original mention is deleted, a mention is flagged as spam and removed, or when we add new attention sources and re-weight our scoring algorithm.

The score is a quantitative measure of the attention a scholarly output has received.

Try it out!

1. Identify the top three sources of mention for any search set via the Highlight tab.
2. Find the attention for a set of outputs
 - Search by name, author, or journal, or upload a list of identifiers via the Advanced Search
 - Try sorting your results by most policy, news, or patent mentions
 - Export your results as a csv for further analysis
3. Locate mentions from specific sources
 - Visit the 'mentions' tab to filter the mentions by a source that's of value to your stakeholders (eg, New York Times, key influencer on Twitter, LSE Book Reviews)
4. Analyze who is engaging with your research
 - Export all of the mentions as a csv and create a pivot table or other sorting tool to see organize all your mentions sources
5. Save your search and set up an email alert to receive regular notifications on the latest activity
 - Click 'save search' and navigate to the saved search dashboard on the left menu panel, selecting a daily, weekly, or monthly report – remember to login to your account first!
6. Create a custom report to share
 - In the saved search dashboard click document icon to open up the custom report builder pop-out and edit each field to meet your needs. Save and share as live-updating URL or pdf
