

Guide to tablet

(1) Start your meeting

Find your meeting in the overview and click **Join**.

External participants could be waiting in the “meeting lobby” and needs to be let in

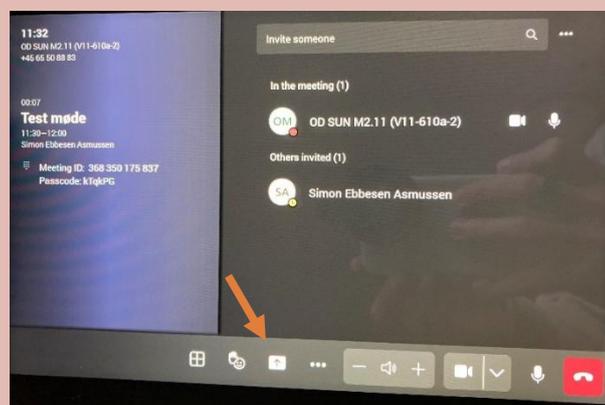

(2) Share content from your PC/Mac

Insert the USB-C plug into your PC/MAC.

If the screens do not turn on automatically, then use the remote found in the room. Place yourself at a distance from the screens, and they will turn on at the same time.

If your screen is not shared within 5-10 seconds, then press **Share** on the tablet

(3) Control panel

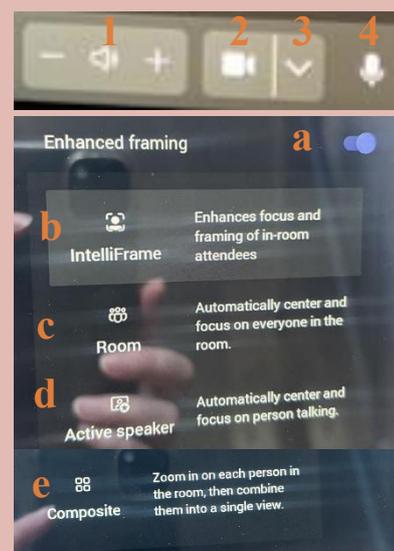

Sound: You can adjust the volume (1) on the tablet (If there is no sound, use the remote to check if the TV has been muted).

Camera: By pressing on the camera icon (2) You can turn the camera on/off. If you press the arrow next to it, you can change the camera settings.

If you activate **Enhanced framing** (a), you get the following options:

- **IntelliFrame (b):** Enhances focus and framing on attendees.
- **Room (c):** Finds the best view where everyone in the room can be seen.
- **Active Speaker (d):** Focuses on the person/people which are speaking.
- **Composite (e):** Automatically catches all participants within the room and gathers them in individual pictures with 1-3 people in one frame.

Microphone: By pressing the microphone-icon (4), you can mute/unmute the microphone in the room.

If you want to get to know the system better, you can find a video-guide by scanning the QR-code:
