

Guide on how to update outdated tests in itslearning

During summer 2026, the original test tool (Test Tool 2.0) in itslearning will be shut down.

If you have yet to update your tests to the newest version (Test Tool 3.0), you can follow this guide in order to do so.

Identify outdated tests in itslearning

- You will not be automatically notified on the fact that there are outdated tests within a course room in itslearning
- Therefore, you must actively go in and check all your tests manually. You can easily check your tests by opening 'Resources' in the different course rooms.
- The outdated tests can be recognized by their grey icon. Updated tests will have an orange icon:

<input type="checkbox"/>	 test	Active test
<input type="checkbox"/>	 test	Outdated test

Updating a test

→ When you have localized an outdated test, click on it. When the test opens, it will say the following:

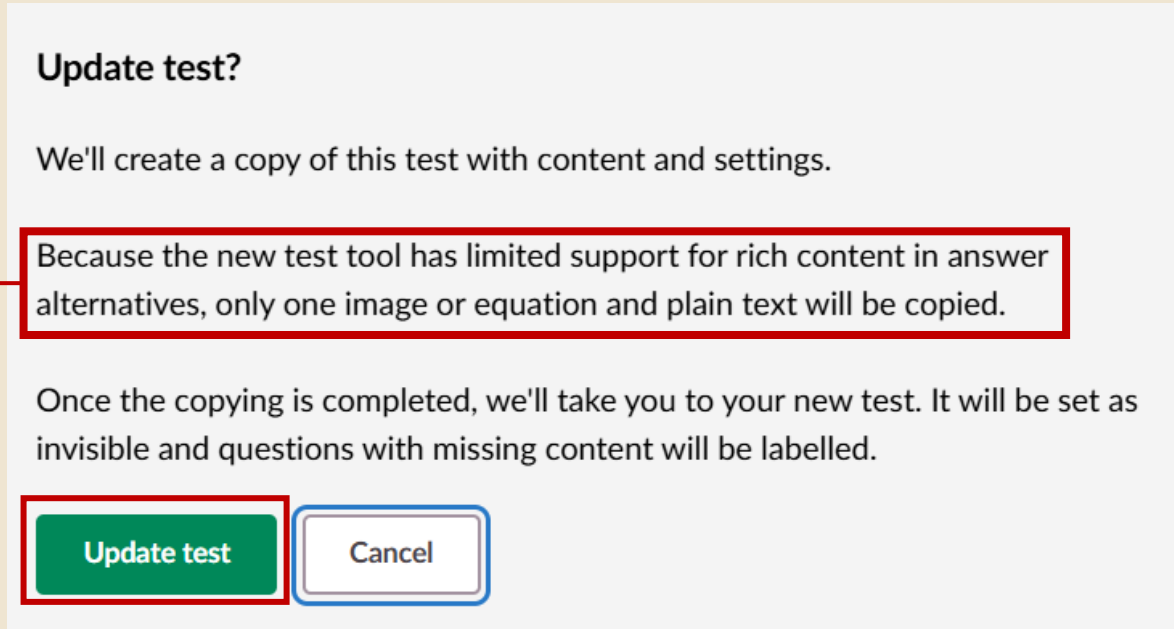

The screenshot shows a web interface for a user named 'Sandbox amnielsen - Anne Mølgaard Nielsen'. The navigation menu includes 'Overview', 'Plans', 'Resources', 'Reports', and 'Participants'. The breadcrumb trail is 'Resources > Information om faget > Update af gammel test > Update af gammel test'. The main heading is 'Update af gammel test'. Below this, there are tabs for 'Test', 'Test categories', 'Questions', and 'Reports'. A light blue notification banner contains an information icon, a red box around a green 'Update test' button, and the text: 'To continue using this test, please update it. We'll copy your content and settings to the new tool. This test (and any s...'. Below the notification, there are two columns: 'Test information' and 'Description'. The 'Test information' column contains the following data:

Published	12. maj 2026 by Søren Jespersen
Deadline	No deadline
Status	Not visible Activate
Participants not submitted	10 Send reminders
Max score	1

At the bottom of the 'Test information' column is a green 'Review test' button.

→ Click on '**Update test**' to start updating the test

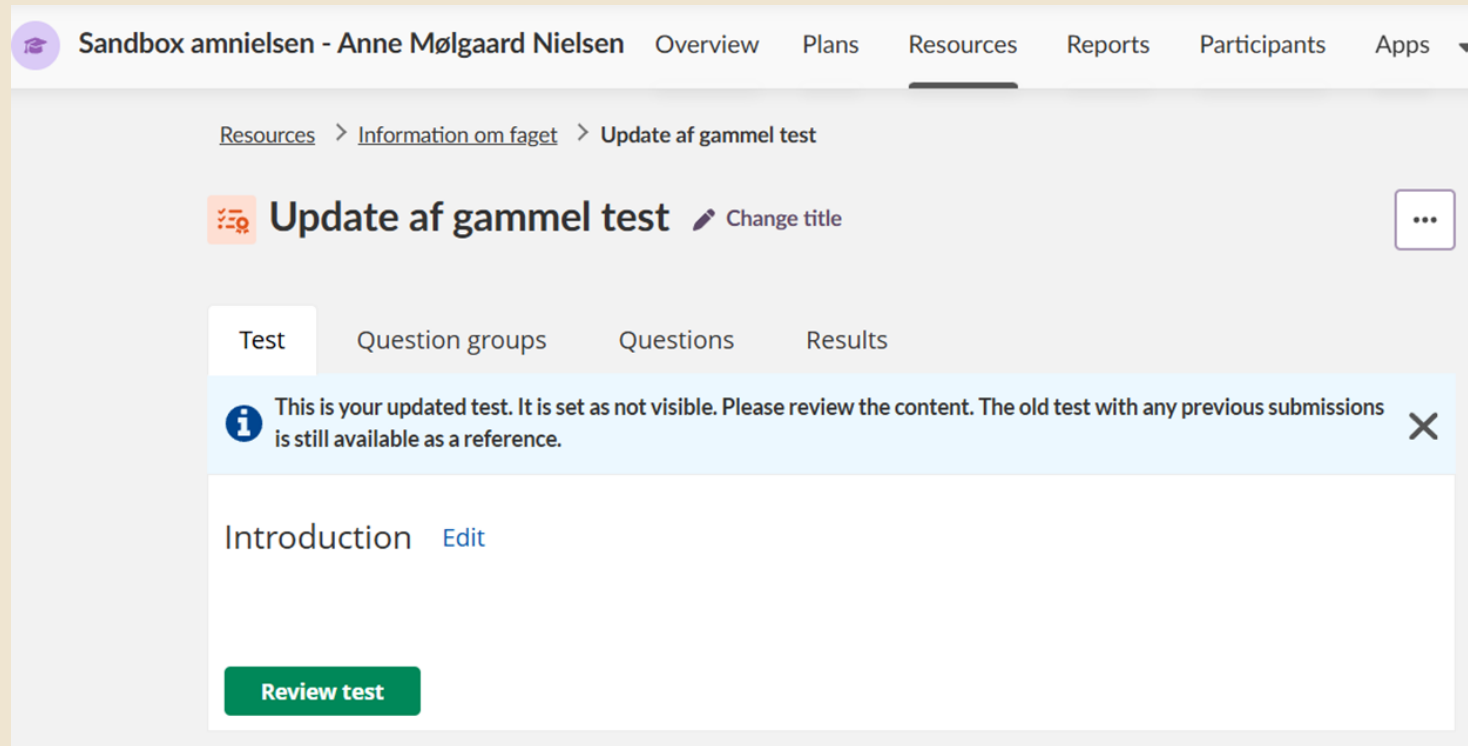

→ Then the following will appear on the screen:

→ **NOTE:** Before clicking 'Update test', you have to be aware of the fact that only one answer option containing "rich content" (like a picture, an equation or regular text) will be transferred over per question, due to limitations within the new test tool.

A copy of the old version of the test will still be saved, even though you have updated it. You then have the option of transferring the remaining answer options over to the updated version of the test.

→ When you have clicked 'Update test' the test will automatically be updated and will afterwards appear as following:

→ **Remember to check the content of the now updated test, as well as the visibility etc.**

The old version of the test will still be saved under Resources in itslearning.

It is recommended that the old tests should be deleted when you have updated and checked the newly updated test.

For more information

→ You can read more about the update on the itslearning support-website [here](#).

→ If you are in need of further help, you can contact EdHub through our inquiry form, which you can find [here](#).
