

TO DETERMINE MELTING POINTS

REICHERT
Since 1875

KOFLER HOT BENCH

Developed primarily to determine quickly the melting points and eutectic temperatures of organic substances, the Kofler Hot Bench also provides a rapid method to observe the presence and behavior of water crystal, the process of decomposition and to judge volatility.

The metal body is 1½" wide x 14½" long and is electrically heated at one end to provide an almost linear temperature drop. The temperature ranges from 50° to 260°C. The scale has temperature lines marked at every 2° and is read by a runner with pointer and tab. Test substances with known melting points are provided to gauge or set the instrument.

To determine a melting point, the substance is laid directly on the chrome-plated surface. With pure substances, there is a sharp dividing line between the solid and fluid stage. The runner is moved until the pointer rests on the dividing line and the temperature is read from the scale. The margin of error is usually not more than $\pm 1^\circ\text{C}$.

CONTENTS, continued

Precision of Simple Flame Photometer	394
J. U. White	
Interlaboratory Study on Determination of Acetyl in Cellulose Acetate	400
MICROCHEMISTRY	
Determination of Microgram Quantities of Sulfide Sulfur	404
B. L. Dunicz and Terkel Rosenqvist	
Spectrographic Determination of Beryllium in Urine and Air	406
R. G. Smith, A. J. Boyle, W. G. Fredrick, and Bennie Zak	
Photometric Determination of Microquantities of Arsenic	409
C. E. Bricker and P. B. Sweetser	
NOTES ON ANALYTICAL PROCEDURES	
Determination of Free Carbon in Atmospheric Dust	411
Robert McCarthy and C. E. Moore	
Separation of 2,4-Dinitrophenylhydrazones of Some Substituted Benzaldehydes by Chromatographic Adsorption	412
A. A. Rosen, K. V. Y. Sundstrom, and W. F. Vogel	
Mass Spectrometric Determination of Oxygen in Water Samples	414
Israel Dostrovsky and F. S. Klein	
Rapid Determination of Organic Acids in Cured Tobacco	415
F. G. Houston and J. L. Hamilton	
Technique for Noting Combustion in Oxygen Bombs	416
C. H. Hale	
Rapid Volume and Concentration Calculations in Industrial Air Analysis	417
P. W. Mullen	
Ascorbic Acid in Analytical Chemistry	418
László Erdey and Endre Bodor	
Chicago Chemical Conference	423
Symposium on Modern Methods of Analytical Chemistry	425
Corrections	393, 426
CRYSTALLOGRAPHIC DATA	
Ethylendinitramine	421
W. C. McCrone	
SCIENTIFIC COMMUNICATION	422
BOOK REVIEW	422
THE ANALYST'S CALENDAR	427
AIDS FOR THE ANALYST	
Wave Spreader for Precision Determination of Half-Wave Potential with Sargent Model XII Polarograph	431
D. N. Hume and T. W. Gilbert	
Thermostated H-Cell for Polarography	431
J. C. Komyathy, Francis Malloy, and P. J. Elving	
Adapters for Introducing Hot Coils into Distillation Flasks for Constancy of Effluent	432
Julian Feldman and Peter Pantages	
THE ANALYST'S COLUMN	15 A
INSTRUMENTATION	21 A
R. H. Müller	
NEW PRODUCTS	29 A
MANUFACTURERS' LITERATURE	32 A

The American Chemical Society assumes no responsibility for the statements and opinions advanced by contributors to its publications. Views expressed in the editorials are those of the editors and do not necessarily represent the official position of the American Chemical Society.

Published by the American Chemical Society, from 20th and Northampton Sts., Easton, Pa. Executive Offices, Editorial Headquarters, and Circulation Department, 1155 Sixteenth St., N.W., Washington 6, D. C. Advertising Office: 332 West 42nd St., New York 18, N. Y. Branch Editorial Offices: Chicago 4, Ill., Room 819, 25 East Jackson, Blvd., Houston 2, Tex., 623 West Bldg., London, Bush House, Aldwych, New York 17, N. Y., 60 East 42nd St., San Francisco 2, Calif., Room 454, 760 Market St. Entered as second-class matter at the Post Office at Easton, Pa., U.S.A., February 18, 1948, under the Act of March 3, 1879, as 12 times a year monthly on the 15th. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of Oct. 3, 1917, authorized July 13, 1918. Annual subscriptions: members \$3.50, nonmembers \$4.00. Postage to countries not in the Pan-American Union \$1.20, Canadian postage \$0.35. Combination rate for ANALYTICAL CHEMISTRY and Industrial and Engineering Chemistry: members \$7.00, nonmembers \$8.00. Postage for the combination: countries not in the Pan-American Union \$3.90, Canadian postage \$1.10. Single copies: current issues, members \$0.40, nonmembers \$0.50; back numbers, prices on request, special rates to members. Claims for missing numbers will not be allowed if received more than 60 days from date of issue. No claims allowed from subscribers in central Europe, Asia, or the Pacific islands other than Hawaii, or because of failure to notify the Circulation Department of a change of address, or because copy is "missing from files."

CHANGE OF ADDRESS: Notify the American Chemical Society at 1155 Sixteenth St., N. W., Washington 6, D. C., of any change of address. Such notification should include both old and new addresses and postal zone number, if any, of the new address.

The American Chemical Society also publishes Chemical and Engineering News, Industrial and Engineering Chemistry, Chemical Abstracts, Journal of the American Chemical Society, and the Journal of Physical Chemistry. Rates on request.
