Cancellation from Morten Birkved and Gang Liu

1. Welcome

Despite some last minutes cancellations, the meeting was held since it had already been postponed several times.

2. SMU

The students report to be lonely and the satisfaction has declined. Corona restrictions and lock down is a big part of the explanation and it there is a need for the programme to help the social engagement when the students return to campus.

This was further discussed under item 3 on the agenda.

3. [Quality Policy](#)

Last year the UUV chose to focus on nr. 8: "Transition to employment and careers".

Jakob suggested to restructure some of the project work. The UUV will look into this.

This year the UUV chose sub-policy nr. 3: "Sub-policy for study environment".

The programme will make a social arrangement for both the new and the old students.

Birgitte will ask Natalie to help with this and Thomas from the new cohort might also be a relevant person to ask. The programme can finance this through money won by answering the SMU last year.

There might be a grill party on campus and the students from both cohorts and the teachers will all be encouraged to participate and network.

4. Follow up on last year's action plan from the status meeting

The programme has followed up on the action plan and is continuously working on improving the student-company connection. Currently a LinkedIn group for students, alumnus and relevant companies is in the pipeline.

Hopefully In-Company projects will also be easier now the corona restrictions end.

5. Exam statis

None of the courses had alarming grades or no-shows.

6. Alumni report

The employment rate is higher than it has been for a long time and the numbers are good.

7. Follow up on the Advisory Board meeting

The meeting was held May 7th and went well.

8. Any other business

A new meeting will be held in August since not everybody was able to participate today.
