Expectancy of Ph.D.-applications

Every head of research is asked to report the expected number of Ph.D.-applications to the Head of Institute expected number. It facilitates the disposition.

Institutforum 28 August 2014

By 15 May all research units must forward two titles to be presented at the Institutforum to Ellinor Kruse. Presentations and PP must be in English. The presentation is to be of max 15 minutes. Questions to presentations from the audience are welcome in both Danish and English.

News from the management team at the Faculty of Health Sciences

The head of institutes were invited to a meeting with the Vice-Chancellor to discuss a.o. economy and Internationalization ([language policy](#)). In general the Danish universities accept more students than expected by the Danish government, and it affects the economy. Therefore the universities will have

to look at the admission requirements, or the government will have to adjust the FTEs charges.

As a result of the official language policy the heads of research of the Institute of Public Health agreed following:

Unit meetings are held in English, in case of foreign colleagues present - otherwise in Danish. As not all employee groups are fluent in or comfortable with speaking English, it's fine to comment or ask questions in Danish, which is thus summarized in English by the chairing person. Minutes of unit meetings are available in Danish and summarized in English.

Presentations as well as power presentations at Institutforum are in English. As not all employee groups are fluent in or comfortable with speaking English, it's fine to comment or ask questions in Danish, which is thus summarized in English by the moderator. Minutes of the Institutforum are

The websites – storytelling

available in Danish and summarized in English.

The units are asked to deliver 4 stories every year on their website (the NEWS Section) in order to promote the research results.

Societal relevance of research

A discussion of societal relevance of research was introduced by Arja R. Aro. The REPOPA project was given as an example.

Round the table

KC: MAXO is expanding. The Long Life Survey is to be renewed. The study reform is expected to be an issue on the Academic Council's agenda.

AA: The education programme in connection with PNU is being restructured.

In order to finance the recruitment of a person to undertake the building of bridges between SDU and UC, funding has been applied for at the Esbjerg Foundation and University of Southern Denmark.
