

EXECUTIVE MEETING

INSTITUTE OF PUBLIC HEALTH

22 MAY 2014

Graduate programmes

The graduate programme in Health Sciences has undergone some changes with respect to compulsory courses. Biostatistics I and II are no longer compulsory, though Biostatistics I is necessary in order to take course II and in order to obtain help through the Biostatistical Consultancy Service. There are now only 2 compulsory courses: Introduction to Health Research (Kaare Christensen) and Responsible Conduct of Research (Bertil Dorch, Head librarian).

Economy

Expected deficit at IPH is decreasing. During 2015-2017 an increased income from Activity Studies, Midwife Sciences and Nursing is expected. In order to cover the education programme in Activity Studies Karen la Cour has employed 100% through ordinary funding.

News from the management team at the Faculty of Health Sciences

While other institutes are requesting key figures from the Faculty, IPH has not, as our institute has an overall good knowledge of our economy, income from teaching and expensed to part-time staff.

News from the Academic Council at Health Sciences

KC would like inputs as to the ongoing discussion concerning professors at hospital departments. Which criteria should apply?

News on the website

News on the web will be in focus in the future. We need to tell the “good stories”.

Around the table
