

# Filesharing with AD Tier servers and WS accounts

Filesharing between SDU PC and SDU server is done with the ImportExport-filesshare. The share can be reached from the SDU PC, once connected to SDU-network, and from the SDU-server.

The address for the ImportExport-filesshare is \\C.SDU.DK\MGT\WS

Open File Explorer and write the address in the address bar. Here you will see a folder with your initials.

**!NB** The share is only intended for importing/exporting files. Content should be deleted when files have been shared. Once a week the content will automatic be deleted with no warning.
