

Together, we can save energy

We spend about 1/3 of the day at our workplace. So our energy consumption matters a lot when we are at work. With energy-friendly initiatives and habits, we can each contribute to SDU becoming part of the solution.

Cut down on power

Make it a habit to turn off lights, screens and other electronic devices when you leave a room or go home.

Cut down on heating and cooling

Heat rooms only to 19°C and keep doors closed between different rooms. Set thermostats equally on all radiators to better distribute the heat.

Use less hot water

When you wash your hands or washing dishes. Your hands will be just as clean using cold water as they will using hot water. Make sure the dishwasher is completely full before starting a programme.

Use climate-friendly transport options

Save fossil fuels by walking, cycling or using public transport when travelling to and from work. Ask your colleagues if you can organise carpooling.

Involve the whole workplace

Start a conversation with your colleagues about how we can save energy in our departments. Also consider operations in your cost-cutting efforts. Together, we can make a difference.

Best regards,
SDU's Climate Ambassadors
